Q1: What is the blockchain?

Blockchain is a decentralized digital ledger that records transactions across many computers in such a way that the registered transactions cannot be altered retroactively, ensuring transparency and security.

Q2: What are the benefits of using blockchain?

Decentralization: Eliminates the need for a central authority.

Transparency: Every transaction is visible to all participants.

Security: Cryptographic techniques ensure data integrity.

Immutability: Once recorded, transactions cannot be altered.

Q3: List some of the features of blockchain.?

Decentralization , Transparency , Security, Immutability

note: do not type out of the box your answer or on the lines only between the lines
and in the box otherwise your answer will not be recognized
